TO: Daron Haddock, Permit Supervisor

FROM: Priscilla Burton, Soils Reclamation Specialist 

RE: New Crusher Facilities, Genwal Coal Company, Crandall Canyon Mine, ACT 015/032, Folder #2, Emery County, Utah.

SUMMARY: The addition of the new crusher facility eliminates the temporary storage capacity for underground development waste rock at the Crandall Canyon Mine.

TECHNICAL DETAILS:

Section 3.3.9 of Genwal Coal Company's Mining and Reclamation Plan states that the area in the vicinity of the present coal load out facility may also serve as a temporary underground development waste rock storage site. The pending Submittal for NEICO State Leases ML-21568 and ML-21569 refers to section 3.3.9 of the MRP for underground development waste disposal. When the new crusher facility is built, this storage capacity will be lost. The Permit must be amended to reflect this change.

RECOMMENDATION:

Genwal Coal Company must develop a new plan for emergency, temporary storage of underground development waste rock to replace the plan described on page 3-16 of the MRP, sec 3.3.9.
